

REVISION TO INDUSTRY DAY

The Army Contracting Command-Rock Island (ACC-RI) and the Project Manager, Maneuver Ammunition Systems (PM-MAS) will be hosting an Industry Day at the Arsenal Island Golf Course & Clubhouse, 1838 Gillespie St., Rock Island, IL 61201. **The Industry day has been rescheduled for 5 August 2014** beginning at 8:00 a.m. The purpose of this Industry Day is to provide information on our planned acquisition of the 40mm Grenade Family System over the next five (5) years (FY15-19).

This announcement should not be construed as a Request for Proposal (RFP) or a commitment by the U.S. Government. The U.S. Government does not intend to award a contract on the basis of this Industry Day.

Please note that this effort is set-aside for small business participation. Attendance of all interested small businesses is strongly encouraged. Interested participants must pre-register for Industry Day by completing the registration form on the Draft RFP website

(https://www.acc.army.mil/contractingcenters/acc_ri/business_opportunities/draft_solicitations_scope/index.html) and providing the form to Ms. Traci Gerth and Ms. Julie Seaba electronically via traci.l.gerth.civ@mail.mil and julie.a.seaba.civ@mail.mil **no later than 22 July 2014.**

Industry Day will be broken down into two (2) parts: (1) General session and (2) One-on-One session. The general session will be scheduled for the morning with One-on-One sessions, approximately 30 minutes long, being conducted in the afternoon. For planning purposes, companies interested in conducting one-on-ones must notify Ms. Gerth and Ms. Seaba **no later than 22 July 2014.** A more definitive agenda will be posted at a later date.

Additionally, we encourage submission of any questions/comments/concerns via the Q&A form provided on the draft solicitation website to Ms. Gerth and Ms. Seaba **no later than 29 July 2014** to allow for discussion/response at the Industry Day. We are looking for feedback relative to (but not limited to) the following:

- Information required by the solicitation;
- Types of terms and conditions needed;
- Existing capabilities in the commercial marketplace;
- Industry and business practices to consider;
- Potential cost drivers;
- Solutions to problems;
- Production issues and transitioning from one contract to the next;
- Potential risks foreseen with this effort and recommendations on how to mitigate/avoid them;

- Comments/concerns/ideas.

It is noted that these, and all, questions and answers will be posted to the draft solicitation website. Accordingly, information will **NOT** be treated as proprietary unless specifically identified as such; please be aware that identifying good ideas as “proprietary” may preclude them from being incorporated into the solicitation.
