Army Contracting Command Rock Island

Our major mission sets under the three buying directorates include:

- *Ammunition*
- *Installation Support*
- *Chemical Demilitarization*
- *Information Technology*
- *Defense Cyber Operations*
- *Enhanced Army Global Logistics Enterprise (EAGLE) Program*
- *Logistics Civil Augmentation Program (LOGCAP)*
- *Global Reachback*

As one of six U.S. Army Contracting Command contracting centers, ACC-RI provides optimal worldwide procurement support to Soldiers, civilians and contractors from an historic island in the middle of the Mississippi River.

ACC-RI supports the readiness of the nation's service members by employing fiscally sound and innovative acquisition techniques. Its award-winning support starts at home: acquiring the logistics and maintenance services that keep the Rock Island Arsenal Garrison running smoothly. However, ACC-RI's impact extends far beyond the installation's gates to encompass a global reach.

ACC-RI's dedication to the warfighter in the field is evident. Since standing up in 2008, several civilian employees have voluntarily deployed or taken overseas assignments in support of ongoing operations. Field support employees frequently travel overseas to meet with customers face-to-face to provide optimal acquisition support and customer service.

The acquisition professionals assigned to the three buying directorates expertly handle the requirements associated with either the Munitions and Industrial Base, Information Technology, or Field Support – including support to Southwest Asia, Europe and Africa.

ACC-RI provides full-spectrum contracting expertise and acquisition support to a diverse set of customers, including more than 25 major customers, including the following:

- U.S. Army Sustainment Command;
- Joint Munitions and Lethality Life Cycle Management

- Command;
- Joint Manufacturing and Technology Center;
- Joint Munitions Command;
- Joint Program Executive Office Armaments & Ammunition (JPEO A&A);
- PEO-Assembled Chemical Weapons Alternatives;
- PEO-Enterprise Information Systems;
- Chief Information Officer of the Army (CIO/G6);
- PEO-Aviation, PM Apache;
- Surface Deployment and Distribution Command;
- Installations Management Command;
- The Office of the Program Manager, Saudi Arabian National Guard.

ACC-RI's workforce, comprised of more than 500 contracting professionals at eight locations, applies innovative approaches to ever-evolving acquisition requirements. As informed and well-trained government representatives, we work tirelessly to meet the requirements of our varied customer base, while negotiating fairly with industry to get the most effective contracting solutions in place for our military.

At ACC-RI, we value and respect our employees, resulting in a motivated, proactive workforce that knows the importance of working closely with our customers. Every day, we hold ourselves accountable to provide the highest quality contracting solutions and uphold the Army Values!
